

# Understanding the Economy

## Course Description

---

Understanding the economy and coping with the economic environment is critical in today's business performance, which is a major concern for managers and investors. The course will address macro-economic factors that may affect the performance of the business. Macro-economic factors include business cycles, interest rates, economic policy, inflation, unemployment, housing starts, money supply, and foreign exchange rates. For example, how the Fed's monetary policy affects corporate earnings is stressed. A variety of economic statistics and indicators are also explained in depth.

**Completion Deadline & Exam:** This course, including the examination, must be completed within one year of the date of purchase. In addition, unless otherwise indicated, no correct or incorrect feedback for any exam question will be provided.

**Course Level:** Overview. This program is appropriate for professionals at all organizational levels.

**CPE Credits:** 8 (CPA)

**Category:** Economics

**Prerequisite:** Basic Accounting

**Advanced Preparation:** None

## Course Learning Objectives
