

Computer and Data Security Basics for the CPA

Course Description

In many cases, network intrusions, loss of data or even loss of funds is due to a failure to follow simple security basics. This course overviews some effective, common-sense techniques to secure your computer or network and associated data that are both low-cost and low-tech solutions. Tips on detecting social engineering emails and employee education to prevent loss of data and funds to social engineers is also discussed.

Completion Deadline & Exam: This course, including the examination, must be completed within one year of the date of purchase. In addition, unless otherwise indicated, no correct or incorrect feedback for any exam question will be provided.

Course Level: Overview. This program is appropriate for professionals at all organizational levels.
