

Excel Illuminated

Intro to Macros – Part 2

Course Description

In this comprehensive on-demand webcast, you'll learn even more about how to use Excel's Record Macro feature from Excel expert David Ringstrom, CPA. He shows you how to enhance the code you've created with the Record Macro feature by adding error-handling functions, decision-making capabilities, and interactive features. In addition, David presents techniques, features, and keyboard shortcuts that will help you eliminate repetitive tasks and become more proficient utilizing Excel macros.

David demonstrates every technique at least twice: first, on a PowerPoint slide with numbered steps, and second, in the subscription-based Office 365 version of Excel. David draws your attention to any differences in the older versions of Excel (2019, 2016, 2013, and earlier) during the presentation as well as in his detailed handouts. David also provides an Excel workbook that includes most of the examples he uses during the webcast.

Completion Deadline & Exam: This course, including the examination, must be completed within one year of the date of purchase. In addition, unless otherwise indicated, no correct or incorrect feedback for any exam question will be provided.

Course Level: Overview. This program is appropriate for professionals at all organizational levels.

CPE Credits: 2 (CPA)

Category: Computer Software and Applications

Prerequisite: None

Advanced Preparation: None

Course Learning Objectives

After studying this course you will be able to:

1. Recognize how to adjust Excel's macro security settings.
2. Recognize which rows in a spreadsheet are affected when you filter data.
3. Recognize an enhanced understanding of Visual Basic for Applications (VBA) macros.
